

MR DENNIS REMMER

Director, E2 Australia – ABN 84 091 984 628
PO Box 6291, Fairfield Gardens QLD 4103 Australia

P: +61-(0)7-38465405 M: +61-(0)4-04004103
F: +61-(0)7-38440414 E: dennis@etwo.com.au

PROFILE

Dennis Remmer is a highly qualified IT professional and is heavily involved in the development of the IT industry in Brisbane and Australia. He has over 12 years of national and international experience in the planning, integration, implementation and mentoring of modern and emerging technologies. Dennis is well regarded for his ability to bridge the technology/business divide.

Dennis has held technologist and management positions (both in-house and through collaboration) with global vendors, specialist firms, industry groups, government departments, and research centres. Particular industry sectors include IT and Communications, Transport, Natural Resources, Health, Industrial Relations, and Education.

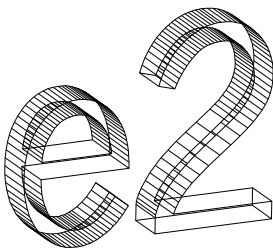

He has instructed many advanced courses, and spoken at many conferences and seminars; most recently covering XML on behalf of Oracle Corporation throughout Asia/Pacific and Scandinavia, and on database systems on behalf of the United Nations at a summer school for industry leaders in Asian developing nations, held in Mongolia.

Dennis has co-authored a book (Java Thin-Client Programming for a Network Computing Environment, Prentice-Hall) whilst on residency at IBM in Texas. He is the National President of the Australian Oracle User Group (AUSOUG).

Dennis holds degrees in Science and Geospatial Information Systems from the University of Queensland.

SPECIALISATIONS

- Key Technologies
 - Java
 - .Net
 - XML
 - DBMS
 - Web Services
 - Internet
 - Geospatial
 - Business Intelligence & Reporting
- Key Services
 - Distributed/Enterprise Systems Architecture
 - IT Solutions Analysis & Design and/or Evaluation & Procurement
 - Software/Content Development Lifecycle
 - Systems Integration
 - Standards and Best Practice
 - Professional Development, Mentoring & Training
- Key Attributes
 - Business/Technology Alignment
 - Technical Abilities
 - Communication and Presentation Skills
 - Business and Technical Documentation
 - Industry Perspective and Network

PROFESSIONAL HISTORY

- Facilities Engineer, Unisys (Australian Centre for Unisys Software) [1990-1992]
- Software Engineer, ARC Systems [1992-1995]
- Principal Consultant, Distributed Systems Technology Centre (DSTC) [1995-1999]
- Director of IT R&D, Collaborative Health Informatics Centre (CHIC) [1999-2000]
- Director, E2 Australia [2000-Current]

IMPORTANT PROJECT AND CONTRACT EXPERIENCE

Enterprise Frameworks for a) Database Management and b) Business Intelligence

Research for and authoring of organisational standards, work instructions and strategic guidelines; including an enterprise database technology architecture, associated governance framework, concept briefs for senior management, best practice guides, development lifecycle, standard operating environments, system management plans, human resource and training strategies, provision of intelligence for enterprise negotiations of vendor licenses, and establishment of organisational focus groups.

Content Management System Reporting Framework

Analysis, implementation, and mentoring of a web-based business reporting framework integrated with a content management system built on BEA WebLogic, Oracle and J2EE.

Web-Based Customer Relationship Management (CRM) System

Data modelling, system specification and project management of a web-based CRM system, primarily involving Oracle and Microsoft technologies. System also incorporates event management, prospect tracking and project repository information.

Distributed Java-Based eBusiness Framework

Joint systems analysis, specification and development of a peer-to-peer Java/XML-based distributed framework enabling electronic B2B transactions via the Internet. System developed (initially) for the coal industry. Patents are pending on the technology developed for this project.

Industry Group Portal

Analysis, specification and implementation of an industry group information and services Portal, based on Oracle, Java and Internet technologies. System features knowledge repository, single sign-on, live news and diary, membership management, numerous reporting services, differentiated access control, etc.

Horticultural eCommerce System

Analysis, specification and prototype development for an online horticultural ordering and trading system, based on Oracle and Internet technologies. The system provides a web-based order entry system and integrates with the client's Oracle Financials infrastructure. The system also provides an online producer/consumer trading mechanism, implementing a complete supply chain facility.

Engineering Document Control System

Design, implementation, and project management for an Oracle-based engineering document control system which integrates legacy data sources and replaces disparate applications. Suite incorporates document registration, maintenance, report generation, plotting, etc.

Land Parcel, Acquisition & Titles System

Analysis, specification and implementation of a GIS system with specifically designed interfaces, applications and modules for; data capture and translation, automated mapping, plan registration and image correlation, graphical attribute / textual data integration, data management, graphics generation, Land Registry query and maintenance modules, acquisitions management, etc.
